

PATENT
Serial No. 10/500,620
Amendment in Reply to Office Action mailed on June 5, 2006

IN THE SPECIFICATION

Please amend the specification as follows:

Replace the paragraph on page 4, between lines 18-24 of the specification with the following:

PLL 10-15 comprises a voltage controlled oscillator (VCO) 10 of which an output forms the output of the PLL 10-15 and is further coupled to an input of a divider 15, of which an output is coupled to a first input of a phase detector 14. A second input of phase detector 14 is coupled to an output of DDS 24, and an output of phase detector 14 is coupled to inputs of two parallel filters 12,13, with an output of first filter 12 being coupled to a first input of a switch 11 and with an output of a second filter 13 being coupled to an a second input of said switch 11. An output of switch 11 is coupled to an input of VCO 10.
